

SUMMARY PROFILE

Seasoned engineering leader and applied scientist seeks growth opportunities with a tech-savvy organization in need of a highly motivated structural partner to build robust processes and communication networks, improve operational efficiencies, control data/service quality, and cultivate a collaborative technical landscape for their employees and clients.

Samples: <https://github.com/forestwhite>

LinkedIn: <https://www.linkedin.com/in/forestwhite>

KEY STRENGTHS

- 12 years of monitoring (CloudWatch, Prometheus, Splunk), data analysis, and data engineering (ETL, data quality, Big Data, RDBMSs, NoSQL DBs, R, Python, Excel, Power BI)
- 28 years of software engineering (SDLC, APIs, TypeScript, Node.js, Java, Python, PHP, SaaS, XML, SOAP+REST)
- 14 years of DevOps and cloud services management (Kubernetes/OpenShift, AWS CloudFormation, Azure DevOps, GitHub Actions, Terraform, Ansible, GCP)
- 8 years IT team leadership, 12 years total management
- Formal and practical experience leading Agile projects

EDUCATION

M.S. Systems and Engineering Management
 Texas Tech University, Lubbock TX

B.S. Computer Science, B.S. Physics (summa cum laude)
 CUNY Lehman College, Bronx NY

B.A. Creative Writing
 UC Santa Cruz, Santa Cruz CA

RECENT EXPERIENCE

Lender Price ■ Remote

Lead Database DevOps Engineer 03/2024-Present

- Updated and migrated hybrid NoSQL database (MongoDB) to a distributed cloud-native version with automated archiving, containerization (Docker), and monitoring (Prometheus, CloudWatch), including upgraded libraries and tools for a multi-channel financial application suite using new Java, Spring Boot, Kafka, RabbitMQ, JUnit, and Mockito versions for data.
- Accelerated throughput by deploying agentic AI (Claude, Aider) solutions for developers and testers.

CGI ■ Remote

Senior Consultant (AWS Infrastructure) 06/2024-11/2025

- Designed, tested, developed, and trained staff on AWS (EC2, S3, CloudFormation) application containers (Apache, JBoss, WebMethods, OpenShift/Kubernetes, Ansible, terraform, shell), microservices, operations, monitoring (CloudWatch), and maintenance automation for integrated Momentum financial cloud applications.

Senior Consultant (Azure DevOps) 03/2024-06/2024

- Designed, tested, developed, and trained staff on strategic source control migrations, CI/CD automation, and testing for CGI-internal applications using Azure DevOps (cloud-based) tools such as Repos(git), Pipelines (YAML), and Artifacts.

Senior Consultant (Full Stack Java) 07/2022-03/2024

- Developed full-stack SOAP+REST enabled web solutions for US Government client using PostgreSQL (flyway), Java 8/11 (Spring Boot, Hibernate), Angular (bootstrap-ng, TypeScript, node.js), and Oracle (data warehouse).
- Mentored junior developers in agile full-stack development strategies, from Angular to Oracle.
- Restored enhanced search features for TSCA applications by analyzing and improving query and data allocation (Elasticache).

Pathward ■ Remote

Database DevOps Engineer (contract) 03/2024-01/2025

- Designed, tested, and developed database (SQL Server, PostgreSQL) change management and Azure CI/CD pipelines (YAML, PowerShell) for financial applications with automated validation and deployment using Redgate Flyway.

Western Digital ■ Remote

Project Manager, DevOps (contract) 02/2022-08/2022

- Managed Agile data migration (Oracle, MySQL) project, communicating and enforcing data quality, master data management (MDM), and taxonomy for factory and development with data and C#/.NET integration.

PassiveLogic ▪ Salt Lake City, UT

Information Developer, Data Standard and API

04/2021-02/2022

- Developed an online active learning application (GraphQL, python, node.js, TypeScript, Enyo, et al.) for the quantum standard data model, a digital twin ontology for sites, buildings, equipment, and integrated systems for data analytics and data science, communicating and improving data quality, master data management (MDM), and taxonomy.
- Enhanced agile project management workflows, program management, and configuration strategies following research into effective requirements management and applying Capability Maturity Model Integration (CMMI).

Etsy, Inc ▪ New York City, NY

API Developer (contract)

04/2021-02/2022

- Built PHP and Docusaurus based developer website for Open API v3: <https://developer.etsy.com/documentation/>.

Syncsort Inc (now Precisely) ▪ Pearl River, NY

Manager

04/2018-01/2021

- Coordinated dozens of global software and cloud delivery teams into an agile program coordinated with Microsoft TFS, JIRA, and IBM EWM, combining quality assurance and support efforts from repeated acquisitions and restructuring efforts.
- Improved operational efficiencies by researching, budgeting, and managing vendors (Intullion, Adobe, Madcap, Webworks, node.js, TypeScript, et al) for a new distributed content management system for the Information Development organization.
- Developed model applications and procedures for cloud (AWS, Google Cloud Platform, Azure), enterprise, and clustered (Hadoop, Hive, Spark, Snowflake) data stores, data lineage, data quality, MDM, taxonomy, and ETL/ELT pipelines for data analytics.

ADEPTCentral ▪ Remote

Content Developer (contract)

08/2017-09/2017

- Authored and updated sales engineering materials for SAP EIM, Big Data, and Cloud/IoT solutions for 2018 release.

Ralph Lauren Corporation ▪ New York, NY

Technical Writer Manager, Platform Architecture

06/2015-04/2017

- Empowered technical partners to integrate with an ecommerce system by authoring Mule Anypoint API portal designs (AWS Lambda, CloudFront, S3, EC2) and RAML configurations to expose internal REST APIs, their proxies and AWS endpoints.
- Slashed proposal review turnaround by up to 90% by mentoring developers and leadership on rapid development practices (Agile) and effectively integrating performance, testing, and support teams into dev processes without loss of throughput.

Google ▪ New York, NY

Technical Writer, Internal Software Engineering (contract)

08/2014-05/2015

- Authored, tested and published technical procedures for full stack service oriented architectures (SOAs), enterprise big data systems ([Spanner](#), [Cloud SQL](#), [Datastore](#)), Google Cloud Platform, and APIs for Java and Python.
- Developed internal web resources (HTML/CSS, YAML, Apps Script, python) for Google developer teams, including code tutorials (Java 7/8, Python, JavaScript/TypeScript), data quality management, taxonomy, and product design deep dives.

Actuate Corporation ▪ San Mateo, CA

Content Developer

02/2007-08/2014

- Deployed, tested, and refined processes for enterprise, cloud (AWS), and mobile (iPhone, Android) deployments of data visualization APIs, asynchronous data processing, data quality monitors, and excel extensions for data science and analytics.
- Organized and delivered exclusive (XHTML, Java 6/7, TypeScript, Adobe, Webworks) projects for individual Actuate OEM clients, cultivating additional revenue streams, including financial clients such as Bank of America and FireScope.
- Managed and tested dozens of interrelated interpretive and technical training projects, including developer tools, APIs, context-sensitive help, JavaDoc/JSDoc, and application extensions for Java, JavaScript/JQuery (Swagger), and XML/WSDL.

CERTIFICATIONS

**IBM Data
Science
Professional (V2)**
April 2023

**Certified Quality
Engineer (CQE)**
February 2022

**Professional
Scrum Master
(PSM I)**
March 2024

**CompTIA Cloud
Essentials+
Certification**
June 2025

**Oracle Certified
Associate (Java 8)**
August 2016

**Microsoft Certified
Professional
(MCP)**
October 2000

SKILLS MATRIX

Skill	Level	Last Used	Years
Computer Science			
Database Design, Taxonomy, Quality, Governance, and ELT/ETL algorithms, optimization	guru	2026	17
SQL databases (SQL Server, Oracle, PostgreSQL, MySQL, db2)	expert	2026	27
Big Data (Hadoop, Hive, Spark, Snowflake, Avro, Parquet)	guru	2025	25
APIs (REST, SOAP, GraphQL, Kafka, RPC, CORBA)	proficient	2021	4
AWS Cloud (EC2, S3, Elasticache, Lambda, Cloudfront, et al.)	guru	2026	23
IBM Cloud (Watson, db2)	proficient	2026	12
Google cloud (BigQuery, Cloud SQL, spanner, containers)	novice	2023	1
Source Control (git, Azure Repos, GitHub, CodeCommit, Hg, p4, SVN, et al)	proficient	2021	4
DevOps (CI/CD, Kubernetes/Openshift, Ansible, terraform, Jenkins, et al.)	guru	2026	24
OOP (Java, Python, Typescript, Angular, PHP, C/C++, perl)	proficient	2026	10
Web services (Apache, JBoss, WebMethods, IIS, glassfish)	guru	2026	27
	proficient	2026	28
Management			
Agile (Scrum, Kanban, Lean, SAE, XP)	guru	2026	15
Human resources	proficient	2022	6
Scheduling, time management (Azure DevOps, JIRA, MS project, Clickup, Asana, SmartSheet, Gantt, TFS, et al.)	expert	2025	13
Quality engineering, root cause analysis	expert	2026	13
Statistical process control	proficient	2022	3
Budgeting, procurement	expert	2021	6
Communication	guru	2026	28
Planning, strategy	expert	2026	13
Empathy	expert	2026	11
Instructional design, mentoring	guru	2024	22
Documentation (Markdown, Docusaurus, InDesign, FrameMaker, Madcap, RAML/YAML, wikis, Confluence, Documentum)	guru	2025	19
Risk management	proficient	2022	9
Data Engineering and Analysis			
Dat modeling (Kimball, Inmon, Boyce-Cobb, Star-schema, datamarts)	guru	2026	
Machine learning (regression, naïve Bayes, kNN, K Means, Support Vector Machines, decision trees, neural networks, forests)	proficient	2024	5
python data/ML libraries (numpy, pandas, scikit-learn, tensorflow)	proficient	2025	8
python data visualization libraries (Plotly, seaborn, Matplotlib)	proficient	2023	3
python data mining libraries (requests/APIs, sqlite, sqlalchemy, beautifulsoup, pyspark)	proficient	2023	3
Statistics	guru	2022	15
Regression (linear, logistic, generalized, matrices, power)	expert	2022	10
Simulation (arena, simio, programmatic)	novice	2022	1
Design of Experiments (SAS JMP, R, python)	proficient	2022	3
BI (JMP, PowerBI, OpenText BI, Actuate, Tableau)	expert	2026	13
Excel (vlookup, pivot tables, charts + graphs, macros, scripts)	expert	2026	19
Research	expert	2026	28
